

TEKNA

Tekna in a nutshell

Thanks to Tekna's timeless designs made from robust, high-quality materials, Tekna has been a pioneer in the lighting world since the early 1990s. The seamless finish of our lighting exudes pure quality. This approach is particularly appreciated both at home and abroad. With the Nautic, Arton, Astone and Flatspot collections, our brand occupies a particularly large segment of the market because we manufacture both architectural, atmospheric and designer lighting.

*"In the right light, at the right time,
everything is extraordinary."*

Handcrafted in Europe

Tekna has a great passion for traditional techniques with a personal touch. Therefore we are always looking for authentic ideas that can be produced by hand, in Belgium. No luminaire is the same, that is the power of "handmade".

Our recipe for success? Pure materials, craftsmanship and solid, functional designs.

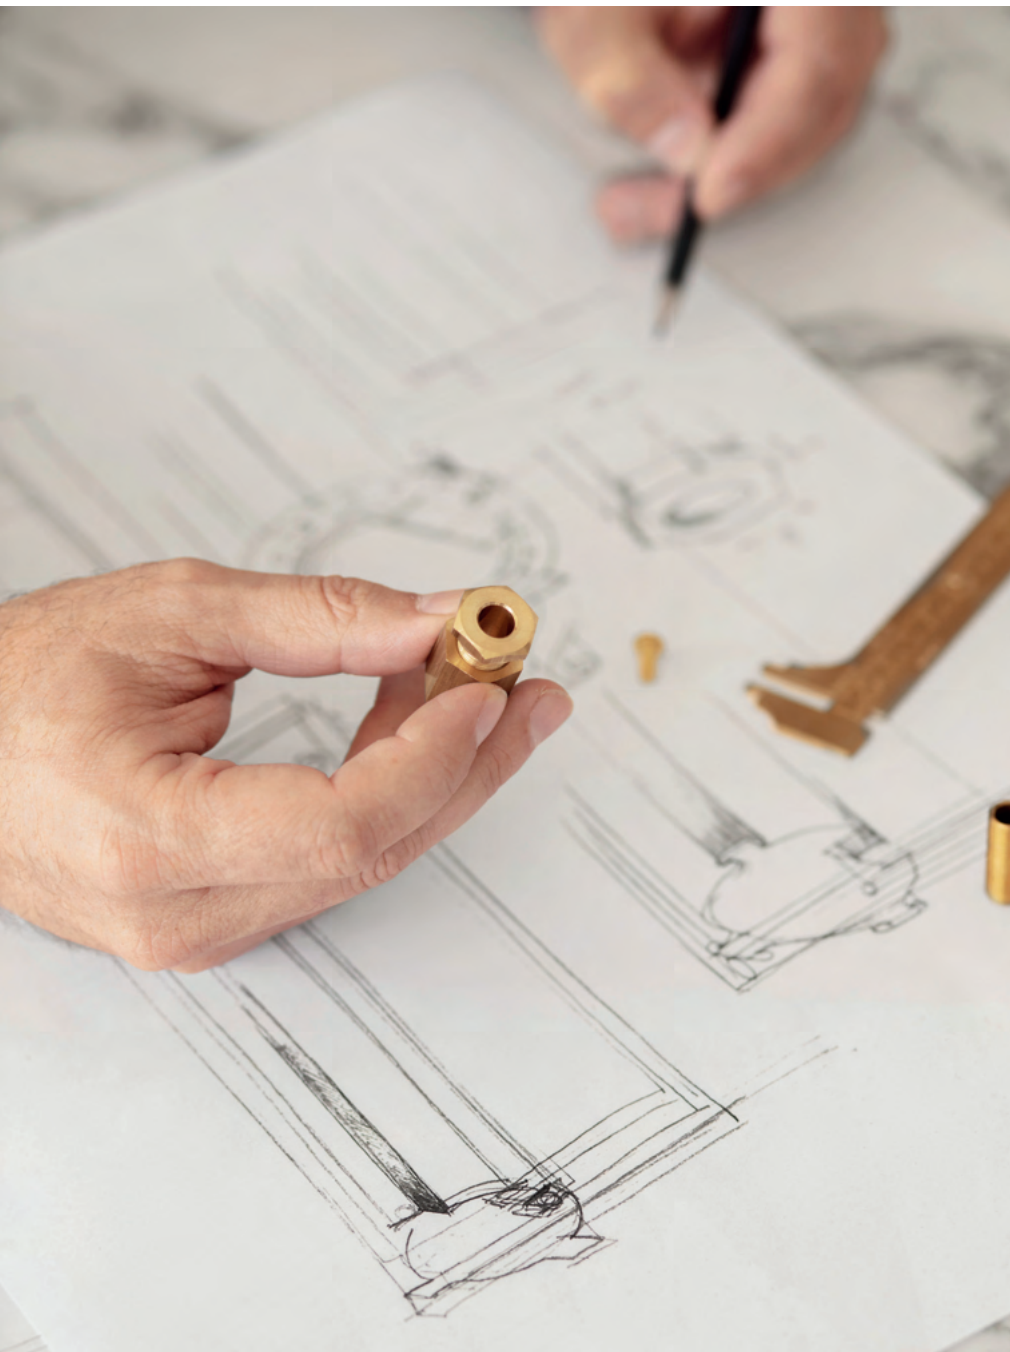

***To create something exceptional,
your mindset must be relentlessly focused on the smallest detail.***

Every design is created with natural materials. Almost 98% of our fixtures are made out of brass. Not only is it a high quality material, it's also a very rewarding and reliable material to work with. You can easily bend it into the desired shape and it can easily withstand all weather conditions. You can also find bronze, aluminum, red copper, marble and glass in our lighting, these noble materials are extremely rewarding and lend themselves perfectly to Tekna's wide range of collections. These robust materials make our brand what it is.

To develop our luminaires, we resolutely opt for one approach: we combine strong, traditional methods with a timeless character. A successful recipe that radiates simplicity, functionality and elegance.

EMERGENCY PACK

Our lighting solutions are also available with an optional emergency pack for a select range of devices. This emergency pack ensures that the lights continue to operate seamlessly during power outages or emergency situations. Once activated, the emergency pack provides up to 3 hours of reliable illumination, giving you peace of mind and maintaining safety in critical moments. Ideal for both residential and commercial environments, this feature ensures that you're never left in the dark when you need light the most.

LÚMMI LED BULB

Our “Lúmmi” LED bulb is crafted with care to achieve perfect harmony with our exclusive lighting designs. After years of dedication, we’ve developed the ideal lamp that seamlessly complements our fixtures, enhancing both their beauty and functionality.

With a warm, inviting glow at 2200K and 400 lumens, Lúmmi creates an unparalleled ambiance. Sustainability was also a top priority; our Lúmmi bulb is entirely plastic-free, featuring a socket made fully of glass. A pioneering step in eco-friendly lighting.

***The fitting is made entirely out of glass.
This distinguishes us as the first on the market.***

Since 2022, all our products have featured the Lúmmi bulb. Please note that images in this catalog predate this update and may show the previous lamp model.

NEW - GET YOUR DEVICE ENGRAVED!

We are excited to announce that from now on, it is possible to have your lighting products engraved with custom text or logos of your choice. Whether you want to add a personal touch, promote your brand, or create a unique gift, our engraving service allows you to personalize your lighting like never before.

Choose your design, and let us bring it to life on your favorite lighting pieces. Make your lighting stand out with a personalized engraving today! You can choose to have an engraving on the front, this service is offered as an additional service.

***Brighten your space with a personal touch –
customize your lighting and make it truly yours!***

Tekna was founded in the early 1990s, continued to innovate and became a real pioneer in the world of lighting.

In 2017 the Blijweert family became the head of Tekna. With a shared passion for the artisan, high quality lighting and an endless experience in the entrepreneurial world, completely ready to take Tekna to the next level.

A word from our CEO

We are convinced that Tekna can broaden its offer and achieve even more by maximizing its strengths. And this last point is extremely important to us, the high level of finishing, craftsmanship and noble materials must always remain the thread that links our products.

Behind every strong brand is a strong team. This team contributes enormously to Tekna's evolution. This evolution is not only characterized by innovative designs, materials and production techniques. There is a strong focus on the quality level of our products and services towards our customers. Everyone is committed to ensuring ever-increasing quality every day.

With a Tekna community spread all over the world, we want to give the world of lighting a new dimension.

- Maxim Blijweert, CEO

POLISHED BRASS

Polished brass is a finish that exudes timeless elegance and luxury, with its radiant, mirror-like surface that gleams with a golden hue. This finish is achieved by hand-polishing brass to a brilliant, reflective shine, creating a stunning, high-gloss effect. The brass is sealed with a protective varnish to enhance its durability, ensuring that the finish maintains its lustrous appearance for years to come. Whether incorporated into classic interiors or modern spaces, polished brass remains a symbol of sophistication and refinement.

DARK BRONZE

The dark bronze finish offers a rich, sophisticated look, achieved by carefully aging brass through a controlled process that brings out a deep, dark patina. This unique process gives the brass an earthy, antique charm, with hues ranging from deep chocolate browns to muted greens and blues, highlighting its strength and beauty. The dark bronze finish adds warmth and character to any space, blending traditional craftsmanship with timeless elegance.

ROUGH DARK BRONZE

The rough dark bronze treatment results in a grainy, matte appearance that adds depth and character. This finish offers a sophisticated, timeless look that enhances any space. The textured surface reflects light in an interesting way, contributing to the fixture's distinct ambiance.

VINTAGE BRASS

Vintage brass offers a warm, inviting look that lies between dark bronze and sateen brass. It is typically bronzed and refined to reveal a unique tone that recalls the charm of older, classic designs. This finish is often used for lighting fixtures that aim to evoke nostalgia or vintage-inspired atmospheres while maintaining the durability of brass.

SATEEN BRASS

Sateen brass is a contemporary finish achieved by sandblasting brass to a smooth, matte texture. The result is a soft, satin-like appearance that offers a refined, understated elegance. This finish is often preferred for its subtlety, as it lacks the high shine of polished brass while still maintaining a warm, golden tone. Once the brass is sandblasted, it is sealed with a varnish to protect the surface from tarnishing and wear, ensuring long-lasting durability.

POLISHED CHROME

Polished chrome delivers a sleek, highly reflective surface that shines with a bright, clean glow. This finish is created by applying a layer of chrome over the base material, resulting in a mirror-like effect that is both striking and sophisticated. Its modern aesthetic makes it a popular choice for contemporary lighting designs, adding a polished and clean finish to everything from sleek minimalist rooms to cutting-edge, industrial spaces.

BRUSHED CHROME

Brushed chrome is a finish with a soft, matte texture that offers a more subdued, yet equally modern alternative to polished chrome. This finish is achieved by brushing the chrome surface with a fine abrasive to create a subtle texture that diffuses light and reduces glare. The result is a sophisticated, contemporary look with a warm metallic sheen that complements various design schemes.

POLISHED NICKEL

Polished nickel features a lustrous, reflective surface with a warm silvery tone, offering a high-end, sophisticated appearance. Its sleek finish enhances the appearance of lighting fixtures with a bright, almost mirror-like shine. Polished nickel is highly prized for its versatility, as it can complement a variety of design styles, from traditional to modern. The warm undertones of the nickel finish make it an excellent choice for adding a touch of luxury to any space, providing the perfect balance of shine and warmth.

BRUSHED NICKEL

Brushed nickel is a satin-like finish that delivers a soft, smooth texture with a subtle grain pattern. This finish is particularly known for its understated elegance and contemporary appeal, offering a sleek yet soft metallic appearance that enhances the beauty of any lighting fixture. The brushed surface reduces glare and fingerprint marks, making it a practical choice for high-use spaces.

Glass

RIBBED GLASS

Ribbed glass is a distinctive material often used in lighting fixtures to enhance both form and function. The glass is etched with vertical grooves, creating a textured surface that diffuses light in a unique and visually appealing way. The result is a soft, even illumination that creates a comfortable, ambient glow in any space. Ribbed glass adds depth and dimension to lighting designs, making it an ideal choice for creating a sense of movement and energy.

FROSTED GLASS

Frosted glass is renowned for its ability to produce a soft, diffused light that creates a warm and inviting atmosphere. The frosted texture results from a sandblasted or acid-etched surface, giving the glass a semi-opaque appearance that softens the light and reduces glare. This finish provides privacy while still allowing light to pass through, making it ideal for creating subtle illumination in bedrooms, bathrooms, and hallways. Its matte finish adds a sleek, modern touch to any design, providing both style and functionality.

NAUTIC®

Nautic is our iconic collection of authentic lighting made from raw materials. Tekna was inspired by the world of shipping. The maritime aspect, the charming character of old trains and the craftsmanship of the factories form the basic idea for the Nautic designs. An original combination where simplicity and functionality are key. The timeless design and choice of materials give the lights a harmonious appearance. They are atmospheric and stylish, without unnecessary embellishment.

Over the years, Nautic has become a real concept in the world of lighting. Thanks to the use of robust materials, the luminaires can withstand all weather conditions and are therefore resistant to sea salt, which is necessary for those who need lighting suitable for coastal areas, for example. Yet the seamless finish gives the collection a very sophisticated look that exudes pure class. And although the Nautic style was originally inspired by nautical art, in recent years we have moved into other styles and now market a wider collection.

WOOD®

Embrace the warmth of nature.

The Wood Collection brings the authentic beauty of wood to modern outdoor lighting. This collection celebrates the natural qualities of wood, seamlessly blending its warm, organic character with sophisticated design and advanced lighting technology. Each piece in the Wood Collection showcases the unique textures and grains of wood, bringing timeless elegance and natural harmony to any setting. Perfect for those who appreciate a balance between modern comfort and the warmth of nature, the Wood Collection transforms outdoor spaces into inviting, serene environments. Each fixture is as distinctive as the wood it's crafted from, creating a unique ambience that celebrates the charm and beauty of the natural world. "The perfect combination of nature and design lighting."

WOOD®

COUNTRY X WOOD	200
CREED X WOOD	202
WILFORD X WOOD	207

Afrormosia is an exquisite premium hardwood sourced from the forests of West and Central Africa. Renowned for its rich, warm tones and distinctive grain, this wood is valued for its remarkable durability and natural resistance to moisture, ensuring lasting quality. The wood's stunning golden to auburn hues effortlessly create a soft, ambient glow when illuminated. Afrormosia enhances lighting designs by combining timeless beauty with exceptional functionality.

AFRORMOSIA

ACCOYA STAINED

Accoya is sustainably sourced from fast-growing, well-managed forests, making it an environmentally friendly choice for lighting. The wood is treated to increase its durability, making it resistant to moisture, decay and weathering. When stained, Accoya's natural grain is beautifully accentuated, revealing rich, warm tones. This high performance wood offers both enduring quality and refined aesthetics. Stained Accoya brings sustainability, elegance and exceptional durability to any design.

ARTON®

Arton allows us to focus on an audience that loves striking, unique and high quality design lighting. Sometimes a little eccentric, sometimes simple with a bit of flair. One thing is for sure, this lighting will grab your attention.

With these designs we surpass many contemporary designs. Tekna makes the difference by combining remarkable design with exceptionally high quality materials and our signature seamless finish.

The inspiration for this collection comes from the Art Deco line with a contemporary touch. Rich colors, geometric figures and exuberant ornamentation are reduced to subtle accents that make each design unique. We love to experiment with shapes, colors, glass textures and materials such as bronze and brass. These combinations often result in innovative designs.

We rely on our in-house designer, who knows better than anyone how to work exclusively and creatively without losing sight of Tekna's core values.

GIOBAGNARA X TEKNA

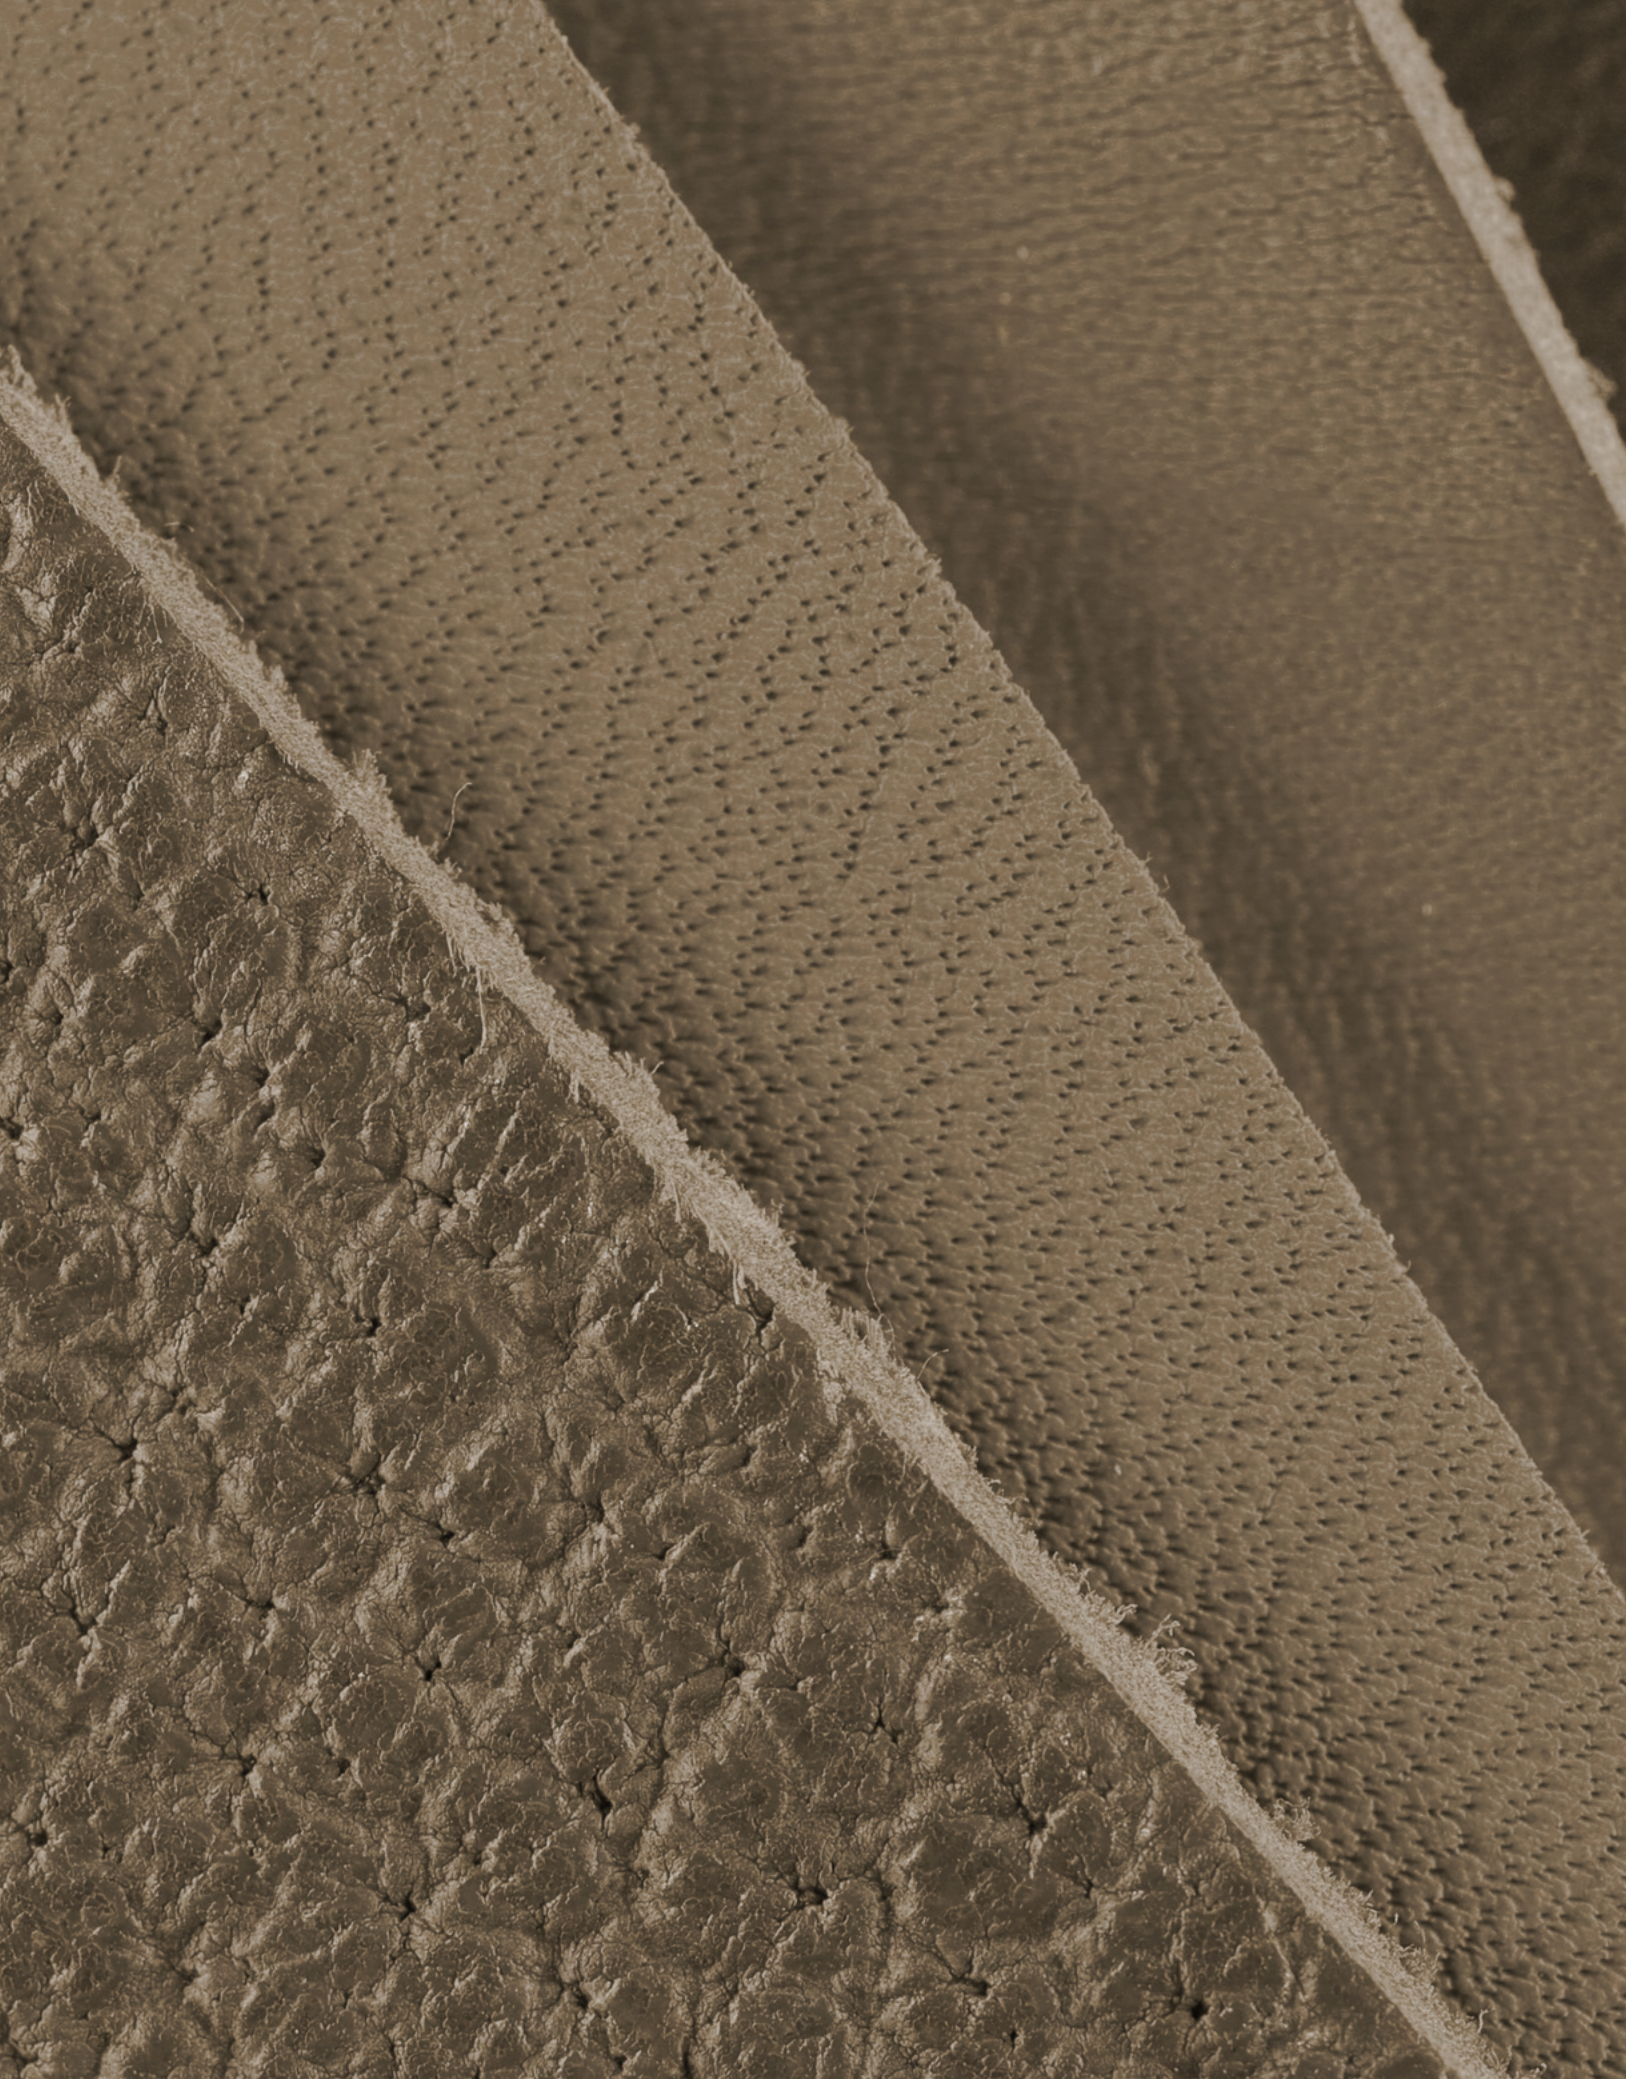

We are proud to present our exclusive and exciting collaboration with GioBagnara, the pioneers of luxury Italian leather. Tekna is constantly striving to improve: creating new designs and exploring cutting-edge materials. As our lighting is all about seamless finishes, authentic design and decorative excellence, we are committed to finding partners who reinforce these high values.

The TEKNA x GIOBAGNARA collection aims to create pieces capable of creating unique atmospheres and enhancing spaces, creating a union where traditional Italian and Belgian lifestyles meet.

GioBagnara, a brand that stands out for its elegantly designed creations that express luxury without ostentation, available in an exceptional and almost limitless range of colours in leather and suede, handcrafted to the highest standards using both traditional know-how and cutting-edge technology.

"Elegant, unique and above all exclusive. The collection is based on these pillars and is unique in its sector. With this collection we want to delight Tekna lovers with quality and detail. Transform any room into a dynamic landscape of light and texture. Mix and match different colors and stitching, all to create your personal masterpiece, carefully treated and assembled by hand".

TEKNA

Thanks to Tekna's timeless designs made from robust, high-quality materials, Tekna has been a pioneer in the lighting world since the early 1990s. The seamless finish of our lighting exudes pure quality. This approach is particularly appreciated both at home and abroad. With the Nautic, Arton and Flatspot collections, our brand occupies a particularly large segment of the market because we manufacture both architectural, decorative and designer lighting.

Tekna has a great passion for traditional techniques with a personal touch. Therefore, we are always looking for authentic ideas that can be handmade in Belgium. No luminaire is the same, that is the power of "handmade".

Every design is created with natural materials. Almost 98% of our fixtures are made out of brass. Not only is it a high quality material, it's also a very rewarding and reliable material to work with. You can easily bend it into the desired shape and it can easily withstand all weather conditions. You can also find bronze, aluminum, red copper, marble and glass in our lighting, these noble materials are extremely rewarding and lend themselves perfectly to Tekna's wide range of collections. These robust materials make our brand what it is.

To develop our luminaires, we resolutely opt for one approach: we combine strong, traditional methods with a timeless character. A successful recipe that radiates simplicity, functionality and elegance.

" With a Tekna community spread all over the world, we want to give the world of lighting a new dimension. "

GIOBAGNARA

Renowned for its elegant creations that convey luxury without ostentation, GIOBAGNARA adheres to the highest standards of craftsmanship. By pursuing a philosophy that incorporates traditional knowhow with leading-edge technologies, and offering a limitless color palette of quality leathers and suede, founder Giorgio Bagnara has been able to experiment and push the technical boundaries of his craft in order to create pieces that are both beautiful and functional.

Launched in 1999, the GIOBAGNARA brand has quickly earned a reputation for expert leather workmanship, and its founder has become a key partner for a large number of interior designers as well as a select group of yacht and private jet designers who rely on his specialized knowledge to realize made-to-measure commissions.

In 2015, Giorgio Bagnara expanded his leather goods portfolio with the acquisition of saddle leather specialist RABITTI1969. In 2017, Bagnara initiated a collaboration with French designer Stéphane Parmentier, who was appointed creative director of GIOBAGNARA and its affiliate brands.

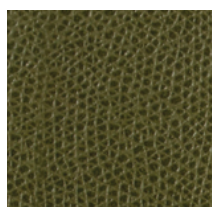

In 2018, the company's portfolio grew with the strategic acquisition of PIGMENT FRANCE, a respected company with specialized skills in leather covering and the weaving of wicker, rattan and straw. Today, two decades after its launch, GIOBAGNARA counts more than 60 employees. The brand now boasts an impressive offer of quality leather homewares and is ready to embark on its next exciting chapter.

ASTONE®

The harmony of art, craftsmanship, advanced technology and light... this is what the Astone Collection aims to achieve. In addition to the well-known materials such as bronze, brass and glass, we are now adding a fourth sustainable material: natural stone. This precious material makes each product unique. No two are alike.

Each product begins as a solid block of stone. This is carved, sanded and milled into a beautiful shape that is unlike any other. Each block tells its own story, the veins, the colors, the textures... all orchestrated by the forces of nature millions of years ago, resulting in a magnificent composition of stones and minerals to be admired by all.

Working closely with our in-house designer and one of the world's leading natural stone companies, we transform these raw material treasures into unique and high quality design lighting. The Astone collections allow us to be creative with colors, textures and shapes.

FLATSPOT®

Flatspot was created in 2009 as a result of the increasing demand for functional indoor lighting. Tekna recognised the challenge and developed Flatspot, a lighting collection consisting of a wide range of spotlights with unique features. Traditional spotlights only illuminate a specific area. Flatspot is designed so that the area of light is much wider and can be targeted without creating shadows on the walls. As a result, we have developed an extensive collection of semi-recessed, recessed and directional downlights.

The Flatspot collection includes luminaires for both domestic and commercial projects. Our largest customer base is the project market. For example, our products highlight objects in museums, shop windows, hotel lobbies and art galleries, drawing attention to the desired location.

You can snap in any recessed spot from this collection into the same mounting sleeve. Simple, fast, durable and great looking. What more could you ask for?
